ANG: Anthropology: Graduate Courses

Courses

ANG 5001  Archaeological Field Survey
3 sh (may not be repeated for credit)
Instruction in archaeological field survey techniques for the identification, location, and documentation of both terrestrial and submerged cultural resources. Subjects include research methodologies, cultural resource management process and regulations, ethical concerns relating to archaeological sites, remote sensing methodologies, magnetometer and sonar applications in maritime archaeology, collection of archaeological and environmental data, use of mapping and surveying equipment, field survey strategies and research design, fundamentals of data collection and recording, FMSF survey forms, report writing and production. Permission is required. Offered concurrently with ANT 4820. Graduate students will be assigned additional work.

ANG 5080  Archaeological Field Survey
3 sh (may not be repeated for credit)
Instruction in archaeological field survey techniques for the identification, location, and documentation of both terrestrial and submerged cultural resources. Subjects include research methodologies, cultural resource management process and regulations, ethical concerns relating to archaeological sites, remote sensing methodologies, magnetometer and sonar applications in maritime archaeology, collection of archaeological and environmental data, use of mapping and surveying equipment, field survey strategies and research design, fundamentals of data collection and recording, FMSF survey forms, report writing and production. Permission is required. Offered concurrently with ANT 4820. Graduate students will be assigned additional work.

ANG 5173  Historical Research Methods in Archaeology
3 sh (may not be repeated for credit)
a practical introduction to the use of historical documents in archaeological research, both as primary sources of data for understanding the past, and as a complement to archaeological and other types of data. Examples and case-studies will center on the history of Florida during Spanish, British, and early American periods.

ANG 5172  Historical Archaeology Seminar
3 sh (may not be repeated for credit)
Emphasizes the goals, methods and theoretical base of historical archaeology. Particular emphasis is placed on theoretical development, acculturation, ethnicity, archaeological methods and documentary research. The class is an organized seminar with readings and discussions of specific topics.

ANG 5157  Pre-Columbian Archaeology Seminar
3 sh (may not be repeated for credit)
Examination of the classic and current literature on key topics in North American Pre-Columbian archaeology including peopling of the New World, archaic adaptations, woodland stage developments, and the Mississippian world.

ANG 5174  Anthropology of Globalization
3 sh (may not be repeated for credit)
Crucially analyzes globalization and the global processes and connections operating in the world today. Examines the complex interactions of people, ideas, economic systems, technologies, commodities, media and other forms that encompass globalization in the post-Cold War era. Offered concurrently with ANT 4473; graduate students will be assigned additional work.

ANG 5154  Spanish Florida in Anthropological Perspective
3 sh (may not be repeated for credit)
Students will explore the key themes and elements of Mexican culture, including the development of a distinct Mexican national culture from Old World and New World roots, as well as the regional diversity of Mexican culture today. As students examine the composition and diversity of Mexican national and regional cultures, they will also encounter topics of race and ethnicity, socioeconomic class, gender, economic development, politics and social organization as they relate to Mexican culture and Mexico's place in the world. Offered concurrently with ANT 4321; graduate students will be assigned additional work.

ANG 5158  Pre-Columbian Archaeology Seminar
3 sh (may not be repeated for credit)
Examination of the classic and current literature on key topics in North American Pre-Columbian archaeology including peopling of the New World, archaic adaptations, woodland stage developments, and the Mississippian world.

ANG 5153  Anthropology of Human Rights
3 sh (may not be repeated for credit)
Examines contemporary debates, topics, and issues in human rights cross-culturally, and focuses on the history of the concept of human rights, universalism vs. particularism, gender, race, religion, social justice movements, and current human rights conventions.

ANG 5152  Anthropology of Globalization
3 sh (may not be repeated for credit)
Crucially analyzes globalization and the global processes and connections operating in the world today. Examines the complex interactions of people, ideas, economic systems, technologies, commodities, media and other forms that encompass globalization in the post-Cold War era. Offered concurrently with ANT 4473; graduate students will be assigned additional work.
ANG 5514  Human Origins
3 sh (may not be repeated for credit)
Overview of the fossil evidence for human evolution, and hominin
behavioral reconstruction using ethnographic and primate models.
Offered concurrently with ANT 4586; graduate students will be
assigned additional work.

ANG 5516  Modern Human Physical Variation
3 sh (may not be repeated for credit)
Evolutionary perspective on function and adaptive nature of biological
variation in modern man. Offered currently with ANT 4516; graduate
students will be assigned additional work.

ANG 5520  Human Osteology
4 sh (may not be repeated for credit)
Co-requisite: ANG 5520L
Detailed examination of human skeletal and dental anatomy,
structure, and function. Techniques of osteological analysis, including
determination of age, sex, stature, ancestry, and pathology. Offered
concurrently with ANT 4525; graduate students will be assigned
additional work. Credit may not be received in both ANG 5520 and
ANG 5466.

ANG 5520L  Human Osteology Lab
0 sh (may not be repeated for credit)
Co-requisite: ANG 5520
Corresponding lab for Human Osteology.

ANG 5536  Bioarchaeology
3 sh (may not be repeated for credit)
Bioarchaeology is the study of human skeletal remains from
archaeological sites. It draws on techniques from archaeology,
anatomy, biology, chemistry, pathology, demography, and history
in order to reconstruct both individual lives and collective population
histories across the globe. Offered concurrently with ANT 4536; graduate
students will be assigned additional work.

ANG 5537  Food, Biology and Culture
3 sh (may not be repeated for credit)
This course is a biocultural examination of the relationship between
food, human health, and society in past and present populations.
Food is a fundamental link between human biology and culture; the
great diversity of human food preferences, aversions, and avoidance
is rooted in both of these domains. The objective of this course is
to consider some of this diversity, and to try to achieve some
understanding, within an evolutionary paradigm, of the causes and
consequences of our food habits. Offered concurrently with ANT 4537; graduate
students will be assigned additional work.

ANG 5550  Primatology
3 sh (may not be repeated for credit)
Overview of the taxonomy, evolutionary history, ecology, and behavior
of non-human primates, and the theoretical basis and methodology
of primate studies. Offered concurrently with ANT 4550; graduate
students will be assigned additional work.

ANG 5803  Ethnographic Research Methods
3 sh (may not be repeated for credit)
This course serves as an opportunity for students to conduct original
research, and to put anthropological theory and method into practice
for insight into a small part of the human experience. We will conduct a
semester-long research project, incorporating several of the methods
anthropologists use ?in the field? to better understand a cultural group:
behavioral observation, interviews and surveys. From the resulting
data, we will work together to analyze and interpret it, culminating in
an original written ethnography. Offered concurrently with ANT 4803;
graduate students will be assigned additional work.

ANG 5905  Directed Study
1-12 sh (may be repeated indefinitely for credit)

ANG 6002  Proseminar in Anthropology
3 sh (may be repeated for up to 6 sh of credit)
Examines selected subjects in anthropology using the perspectives of
all three sub-disciplines; cultural anthropology, biological anthropology,
and archaeology. The seminar’s goals are to introduce students to the
subject, provide in-depth understanding of current issues, and examine
the variety of theoretical and methodological approaches used by
anthropologists. Contact department for specific topic each semester
offered. No more than 6 semester hours credit may be received.

ANG 6093  Research Design in Anthropology
3 sh (may not be repeated for credit)
The fundamental issues of research design and implementation
and the objectives and strategies of contemporary anthropological
research. Scientific procedures and methods in the development
of research programs that are logically structured and fundable.
Alternative forms of deriving knowledge relating to important issues in
epistemology and the philosophy of science will also be discussed.

ANG 6110  Advanced Method and Theory in Archaeology Seminar
3 sh (may be repeated for up to 6 sh of credit)
Includes an overview of the history and development of American
archaeology with an emphasis on methodological and theoretical
topics. Class is an organized seminar with readings and discussions of
specific topics.

ANG 6138L  Advanced Laboratory Methods in Archaeology
3 sh (may not be repeated for credit)
Advanced training in the operation of an archaeological laboratory.
Activities include laboratory organization and management as well
as planning laboratory activities to meet deadlines, assignment of
tasks, training, and supervising beginning students. Graduate students
will instruct undergraduate students in artifact identification and
documentation. Credit may not be received in both ANG 6138L and
ANG 6823L.

ANG 6196  Policies, Practices and Archaeology in Historic
Preservation
3 sh (may not be repeated for credit)
Legislation and regulations concerning cultural resources and the
historic preservation system. Also covers compliance archaeology,
contract archaeology, ethics, collecting, looting and the role of Native
Americans and ethnic groups.
ANG 6286 Contemporary Cultural Anthropological Theory  
3 sh (may not be repeated for credit)  
Through readings and seminar discussion, students will explore key  
themes and thinkers of the past few decades which have contributed  
to the production of contemporary culture theory in anthropology.  
Important topics will include structuralism, cultural materialism,  
feminism and anthropology, post-modernism, world systems theory,  
post-colonialism, and symbolic anthropology. Key theorists will include  
Claude Levi-Strauss, Marvin Harris, Mary Douglas, Clifford Geertz,  
Sherry Ortner, Gayle Rubin, Pierre Bourdieu, Arjun Appadurai, and  
James Clifford.

ANG 6583 Evolutionary Theory in Biological Anthropology  
3 sh (may not be repeated for credit)  
Overview of seminal literature and key concepts in evolutionary theory,  
with particular emphasis on contemporary issues in human bio-cultural  
evolution.

ANG 6824 Advanced Archaeological Field Methods  
3-6 sh (may not be repeated for credit)  
Advanced training in field methods including survey, testing, and  
site excavation. Also includes training in project planning, budgeting,  
supervision, and integration of information recovered from the field.  
Material and Supply Fee will be assessed. Permission is required.

ANG 6905 Directed Study  
1-12 sh (may be repeated indefinitely for credit)

ANG 6971 Anthropology Thesis  
1-6 sh (may be repeated for up to 6 sh of credit)  
Preparation of master's thesis which includes problem identification,  
review of literature, design, data collection, analysis, and results.  
Permission of Thesis Committee required. Graded on satisfactory /  
unsatisfactory basis only.
