BCN: Building Construction Courses

Courses

BCN 2272  Blueprint Reading
3 sh (may not be repeated for credit)
Provides students with knowledge, skills and abilities to accurately interpret commercial construction documents. Addresses standards for construction drawings, drawing quality, drafting techniques and drawing literacy and information retrieval.

BCN 2405  Statics and Strength of Materials
3 sh (may not be repeated for credit)
Prerequisite: MAC 1114 AND PHY 2053
Analyze strength of structural elements for buildings, bridges and specialized structures that utilize steel and timber and concrete. Covers the statics of particles, rigid bodies, friction, strengths of materials such as wood, steel and concrete.

BCN 2905  Directed Study
1-12 sh (may be repeated indefinitely for credit)

BCN 3224  Construction Materials and Method
3 sh (may not be repeated for credit)
Explores changing materials, methods and technologies in construction. Focuses on the most common and practical building materials and methods to provide students with knowledge, skills and abilities related to the means and methods of construction.

BCN 3281C  Construction Survey and Building Layout
3 sh (may not be repeated for credit)
Prerequisite: MAC 1114
Application of surveying skills required in the field of construction, including building layout, indirect determination of elevation and distance, referencing, establishment of grade, and topographic mapping. Instruments used will include transit and automatic level. Credit cannot be received for both BCN 3281C and BCN 3282C.

BCN 3561  Construction Mechanics I
3 sh (may not be repeated for credit)
Prerequisite: MAC 1114
Introduction to building mechanical and electrical system basics and related equipment. Areas of study included in this course are heating, ventilating, air conditioning (HVAC) systems, plumbing systems, and HVAC design basics.

BCN 3590  Sustainable Construction
3 sh (may not be repeated for credit)
Provides an overview of Sustainable Construction, the basic philosophical premises and concepts, the cutting edge in design and construction, methods of assessment, project delivery, economics, and green building evaluation systems, such as LEED and Green Globes. Students will learn the importance of sustainable construction and the emergence of green building concepts in the construction industry. Focuses on concepts and learning to facilitate application in real-world scenarios.

BCN 3731  Construction Safety
3 sh (may not be repeated for credit)
Addresses the principles of safety in construction and project management. Focuses on the OSHA 29 CFR 1926 Construction Industry Regulations, construction site risk aversion, insurance, site specific paperwork and documentation, maintenance of traffic, cost, scheduling and job hazard analysis.

BCN 3762  Building Codes
3 sh (may not be repeated for credit)
Covers the general requirements of the Florida Building Code for commercial construction, based on occupancy classification and construction type. Provides information about code agencies, organizations and resources related to the building construction approval process.

BCN 3767  CDT Prep Course: Construction Documents
3 sh (may not be repeated for credit)
Preparation for the National Construction Specification Exam for Construction Document Technician certification. Material and Supply fee will be assessed.

BCN 3905  Directed Study
1-12 sh (may be repeated indefinitely for credit)

BCN 4258C  Building Information Modeling
3 sh (may not be repeated for credit)
Prerequisite: BCN 2272 AND BCN 3224
Introduction to 3D Modeling software for Building Information Modeling (BIM). Activities are designed to provide in-depth theory with the use of BIM information and the impact on construction contracts and processes. There is a downloadable free BIM program that will be used but the student must have their own computer to load the program and use it for this course.

BCN 4431  Structures
3 sh (may not be repeated for credit)
Prerequisite: BCN 2405
Analysis and design of structural elements for buildings, bridges and specialized structures which utilize steel and timber. Includes the evaluation of beam shear, deflection, bearing and moment, plus column behavior, along with their connectors for both steel and timber, including laminates and plywood.

BCN 4461  Soils, Concrete, and Masonry
3 sh (may not be repeated for credit)
Prerequisite: BCN 4431
Analysis and design of concrete elements as related to construction, including forms, formwork design and form materials. Examination of reinforced concrete strength design methods as well as codes and safety as they apply to concrete structures.

BCN 4564  Construction Mechanics II
3 sh (may not be repeated for credit)
Prerequisite: BCN 3561
Introduction to electricity, power supply and distribution, communications, life safety, and security systems, electrical design and wiring, light and lighting, lighting equipment and systems, and calculations of illumination.
BCN 4701  Construction Administration  
3 sh (may not be repeated for credit)  
Overview of the construction industry and professional requirements of management, administration and project management in construction environments. Consideration of information required to sit for the contractor's examination.

BCN 4720C  Scheduling  
3 sh (may not be repeated for credit)  
Provides fundamental concepts of scheduling techniques, applications and software packages. Students will be provided hands on experience with appropriate software.

BCN 4773  Construction Finance and Controls  
3 sh (may not be repeated for credit)  
Prerequisite: EGN 3613  
The basic principles and application of construction ownership and business management will be covered. The emphasis for the course will be on financial management, risk management, labor law, worker's compensation. Accounting competencies are also covered. The outline for the course covers the topics contained in the Business Section of the Florida Contractor's Manual. Additionally, sections of the AICPA Audit and Accounting Guide for Construction Contractors will be included.

BCN 4905  Directed Study  
1-12 sh (may be repeated indefinitely for credit)

BCN 4940  Construction Internship/Senior Project  
3 sh (may not be repeated for credit)  
Field-based experience where students work in real-world situations with industry professionals. Students unable to locate an internship complete a complex problem solving project under the direction of the instructor. Permission is required.
