EME: Education: Technology And Media Courses

Courses

EME 1660C  Engineering Technology Applications in Aviation  
College of Ed and Prof Studies, Department of Instructional Design and Tech  
1-2 sh (may be repeated for up to 6 sh of credit)

Learners will apply engineering technology concepts to successfully plan and execute aviation-related mission scenarios in a high-fidelity fully immersive learning environment at the National Flight Academy in Pensacola, Florida.

EME 2040  Introduction to Educational Technology  
College of Ed and Prof Studies, Department of Instructional Design and Tech  
3 sh (may not be repeated for credit)

Assists educators in developing skills and competencies which are essential to the integration of technology into the delivery of classroom instruction. Students will survey a wide variety of instructional technology materials and systems. They will also learn to use these tools in a classroom environment.

EME 3002  Intelligence and National Security  
College of Ed and Prof Studies, Department of Instructional Design and Tech  
3 sh (may not be repeated for credit)

Students will develop an academic understanding of national security and the government agencies that are responsible for protecting the United States and its interests. Students will learn about the intelligence cycle, national security decision making, and the intelligence community and review case studies of intelligence in action. Students will also become familiar with analytic writing and intelligence analysis through case studies and weekly assignments of current national security news.

EME 3003  Open Source Intelligence  
College of Ed and Prof Studies, Department of Instructional Design and Tech  
3 sh (may not be repeated for credit)

Provides students with an academic and practical understanding of Open Source Intelligence (OSINT) and its applications. Students will learn about Open Source Intelligence as a discipline, its place in the intelligence world, and OSINT planning and execution. Students will become familiar with OSINT acquisition and exploitation techniques by developing an understanding of available technological tools and capabilities.

EME 3230  Technology Integration Planning  
College of Ed and Prof Studies, Department of Instructional Design and Tech  
3 sh (may not be repeated for credit)

Provides students with the knowledge, skills, abilities, and attitudes necessary to implement instructional technology. Students will learn to identify the constraints and risks associated with instructional technology planning and implementation. Students will utilize software tools associated with the implementation of instructional technology.

EME 3312  Technology Supported Learning  
College of Ed and Prof Studies, Department of Instructional Design and Tech  
3 sh (may not be repeated for credit)

Examines the use of current and emerging technologies to facilitate learning. Topics covered will include distance learning, formal and informal technology based learning and mobile learning. Strategies for integrating technology in educational settings will be explored.

EME 3351  Introduction to Instructional and Performance Technology  
College of Ed and Prof Studies, Department of Instructional Design and Tech  
3 sh (may not be repeated for credit)

The distinct purposes of instructional technology and human performance technology are explored in depth in this course. The foundations and evolution of each discipline serve to establish distinct definitions that will be investigated. The similarities and differences will be compared to include the historical basis, models, major tasks, and desired outcomes.

EME 3402  Information Technology Infrastructure Analysis and Recommendation  
College of Sci and Engineering, Department of Department of Information Tech  
3 sh (may not be repeated for credit)  
Prerequisite: EME 4627

Students will develop the knowledge, skills and abilities necessary to analyze technology infrastructure needs of various types and sizes of organizations and provide appropriate solution recommendations to solve complex problems. Meets Gordon Rule Writing Requirement.

EME 3406  Web Presence Deployment Strategies  
College of Sci and Engineering, Department of Department of Information Tech  
4 sh (may not be repeated for credit)  
Prerequisite: EME 4627

Technology Systems Specialists support the development and implementation of the web presence for an organization. An organization's web presence integrates a wide variety of technologies into a system that projects its identity and services out through the Internet via any number of media. This integration requires learners to plan, select, produce, organize and manage materials and systems in a variety of settings. Learners will develop strategies to design, develop, and evaluate information-based solutions that meet the needs of stakeholders with real-world communication problems.
EME 3410  Emerging Technology in the Classroom
College of Ed and Prof Studies, Department of Teacher Ed & Ed Leadership
1 sh (may not be repeated for credit)
Prerequisite: EME 2040
Examines specific methods for integrating technology (hardware and software) into subject area curricula in the classroom. Students will explore models of technology integration, classroom management and administrative tasks that can be performed more efficiently using technology, and learn strategies to select appropriate mediums when planning for technology integration. Individualization will allow each student to select and develop materials in their disciplines.

EME 3624  Training Needs Assessment
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Examines the role of training needs assessment in instructional design. Students will be introduced to techniques used to collect and analyze data to identify and clarify training needs. Prepares students to employ needs assessment techniques to determine who needs to learn what and why prior to engaging in the design and development of instructional materials.

EME 3710  Engineering Technology Applications in CompTIA Security+
College of Sci and Engineering, Department of Department of Information Tech
3 sh (may not be repeated for credit)
Security+ includes important foundational principles for securing a network and managing risk. Access control, identity management and cryptography are important components of the course. Mitigation and deterrent techniques are provided to prevent network attacks and expose potential vulnerabilities. Successful completion of the CompTIA Security+ exam meets the Information Assurance (I.A.) technical and management certification requirement? outlined by the U.S. Department of Defense. Non-degree seeking students will be required to pass an online pre-test with a minimum score of 80% prior to enrollment.

EME 3711  Engineering Technology Applications in CompTIA Network+
College of Sci and Engineering, Department of Department of Information Tech
3 sh (may not be repeated for credit)
Network+ includes topics in network technologies, installation and configuration, media and topologies, management, and security. Certification in Network+ enhances several occupations including: network administrator, network technician, network installer, help desk technician and IT cable installer. Network+ is the technical prerequisite option? for IT technicians requesting to join the Apple Consultants Network. Successful completion of the certification exam is recognized by the U.S. Department of Defense. Non-degree seeking students will be required to pass an online pre-test with a score of 80% or better prior to enrollment.

EME 3905  Directed Study
College of Ed and Prof Studies, Department of Instructional Design and Tech
1-12 sh (may be repeated indefinitely for credit)

EME 4001  HUMINT Operations
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Students will learn the importance of human originated information, or HUMINT, in the context of law enforcement, military and intelligence operations. Students will learn about interview, interrogation and elicitation techniques that are employed within the law enforcement and national security communities. Students will be able to recognize and describe the difference between overt and clandestine source operations and when HUMINT should and should not be utilized in the pursuit of legal or national security priorities. Students will also be able to assess basic psychological indicators in the profiling of historic espionage cases and their impact on national security.

EME 4043  Instructional Technology Leadership
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Students will examine the role of the technology leader in effective integration, management and use of technology in a variety of settings, including education, training, military, public sector and non-profits. The course focuses on technology, information, and information literacy. Special attention is paid to the role of systems thinking in effective technology leadership. Offered concurrently with EME 5316, graduate students will have additional work.

EME 4083  Program Evaluation in Instructional Design and Technology
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Students will develop skills used in selecting the appropriate model for conducting various types of evaluations. A series of models will be reviewed and aligned with evaluation purposes and questions. Applying the appropriate evaluation model is critical to ensuring that interventions, programs, and projects are successful. Development of a comprehensive evaluation plan will provide students with the opportunity to align an evaluation model with data collection strategies and techniques for a specific evaluation purpose.

EME 4313  Wireless and Mobile Communications
College of Sci and Engineering, Department of Department of Information Tech
3 sh (may not be repeated for credit)
Introduces common wireless technologies and wireless network architectures including common carrier cellular networks. Learners will examine characteristics of these technologies and identify their roles in enterprise-class information technology operations. Learners will identify common tools and applications associated with these technologies and explain their roles in design, deployment and management of them. Wireless technologies strengths and weaknesses are described in the context of their effect on enterprise security, performance and cost management.
EME 4343  Multimedia Design and Development
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Prerequisite: EME 3351
The basic visual and typographical elements and technical aspects of multimedia design and development to support learning are the focus of this course. Students will apply instructional design strategies and principles of multimedia learning to the design and development of multimedia. Included are a selection of software applications and services, design principles, hands-on production, and discussion of issues and useful resources.

EME 4350  Human Performance Technology
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Prerequisite: EME 3351
Introduce students to the field of Human Performance Technology (HPT). Students will be introduced to research, theories and models associated with HPT, preparing them to conduct comprehensive performance, gap and cause analyses in organizations to identify and provide both training and non-training based solutions to address organizational performance concerns.

EME 4352  HPT Intervention Selection and Design
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Prerequisite: EME 4350
Human Performance Technology (HPT) interventions are selected to resolve gaps in desired performance. The skills required to align interventions with the cause(s) of the problem are the focus of this course. Students will classify interventions using various models of Human Performance Technology and select potential interventions to resolve identified problems in human performance scenarios. Students will also develop a formal proposal to communicate recommendations to stakeholders.

EME 4474  Technical Intelligence Collection
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Introduces students to intelligence disciplines (ELINT, SIGINT, MASINT, GEOINT) and intelligence organizations (NSA, NGA, NRO and DIA). Students will examine the history of these organizations, technologies used in each intelligence discipline, and common uses of each technology. The course focuses on improving analytical writing and research skills in the intelligence discipline.

EME 4622  Technology Systems Operations: Management Strategies
College of Sci and Engineering, Department of Department of Information Tech
4 sh (may not be repeated for credit)
Prerequisite: EME 4627
Students will develop skills and abilities to effectively manage a networked system. Network-related fault management, configuration, security, performance, and utilization measurements will be addressed. Lessons will include in-depth examination and appropriate applications in each functional area. Hardware and software tools that are required to perform network management tasks will be examined.

EME 4673  Foundations of Instructional Design
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Prerequisite: EME 3351
Introduces students to the field of instructional design, a systemic and systematic, research-based means of designing effective, efficient, learner focused instruction. Students will use the ADDIE process to design a lesson.

EME 4674  Development of Instructional Materials
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Co-requisite: EME 4673
The pedagogical, technical, and logistical aspects of instructional messages will provide the foundation for students to learn the fundamentals of instructional development in this course. Message design principles and individual preferences are considered as they relate to the development of instructional materials. Media and technology aspects relating to effective message delivery will be addressed and related to the logistical constraints of time and cost.

EME 4684  Instructional Design and Technology Capstone
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
The capstone is designed to enable students to demonstrate mastery of the Instructional Design and Technology knowledge, skills, and abilities developed during the academic program. Students will identity, propose, and complete a capstone project and develop an electronic portfolio highlighting their attainment of the program level learning outcomes.

EME 4905  Directed Study
College of Ed and Prof Studies, Department of Instructional Design and Tech
1-12 sh (may be repeated indefinitely for credit)
EME 4944 Internship/Practica
College of Sci and Engineering, Department of Department of Information Tech
3 sh (may not be repeated for credit)
Observation of and participation in technology systems related roles in professional settings. Students participate in field-based experiences related to their course of study and future goals. Prerequisite: Permission of instructor.

EME 5316 Instructional Technology Leadership
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Students will examine the role of the technology leader in effective integration, management and use of technology in a variety of settings, including education, training, military, public sector and non-profits. The course focuses on technology, information, and information literacy. Special attention is paid to the role of systems thinking in effective technology leadership. Offered concurrently with EME 4043, graduate students will have additional work.

EME 5457 Distance Education Technologies
College of Sci and Engineering, Department of Department of Information Tech
3 sh (may not be repeated for credit)
Distance education will be investigated as an instructional method in terms of delivery, development, and implementation. Students will design a distance education environment that uses emerging technologies that support distance delivery. Offered concurrently with EME 4454; graduate students will be assigned additional work.

EME 5905 Directed Study
College of Ed and Prof Studies, Department of Instructional Design and Tech
1-12 sh (may be repeated indefinitely for credit)

EME 6054 Foundations of Instructional Technology
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Students investigate theoretical, historical, sociological, and philosophical perspectives and applications of instructional technology in education and training environments. Students develop the knowledge, skills, and abilities needed to integrate instructional technology theories and processes into education and training settings. Students are introduced to the theoretical and philosophical foundations of the field, and they are empowered to develop a comprehensive definition of the field and a broad perspective of IT on educational and training settings.

EME 6062 Applied Instructional Technology Investigations
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
This course provides an introduction to past, present, and future instructional technology research. Research paradigms and underlying theory appropriate for IT are emphasized. Quantitative, qualitative, and mixed methods research designs and appropriate data analysis techniques are explored.

EME 6317 Instructional Technology for Educational Leaders
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
This course provides future technology leaders with the basic terminology, historical perspectives, theoretical basis, research and practical application of instructional technology to enable them to be empowered persons and professionals who work in educational settings. This course builds knowledge and skills to assist school and district leaders in using and applying instructional technology planning and management techniques to real-world situations. Upon completion of the course, students will have the ability to use instructional technology for administrative and instructional purposes and to plan, organize, and promote its use in PK-12 educational environments.

EME 6408 Integrated Technology Learning Environments
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
The skills and abilities necessary in planning for the integration of technology into educational and training environments are the focus of this course. Students will develop a technology integration plan for a real-world scenario through the application of the major practices and models of technology integration.

EME 6409 Distance Learning Implementation
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Integrates theory and best practices to explore and develop skills for developing and implementing effective education and training environments delivered via distance learning media. Students will focus on the principles and practices that are research-based and result in quality distance learning experiences, and students will explore technologies available to support and distribute distance learning and the considerations unique to distance learning. The course focuses heavily on online environments, and it emphasizes application of the best practices by enabling students to develop and implement their own instructional lessons that are delivered via distance learning technologies.

EME 6414C Web-Based Instructional Tools for Educators
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Students will gain the knowledge and skills necessary to design and develop web-base instruction using a variety of current technologies. Through integrating theory and application, students will learn to critically examine the instructional capabilities of various technologies and identify instructional strategies that support integration. Multiple units of instruction will be developed and designed that demonstrate the ability to align technology integration with the principles of learning theory and instructional design.
Provides students with fundamental knowledge and skills related to the intervention implementation and change management activities associated with the practice of Human Performance Technology (HPT). Examines models of change management, the role of the change agent and the importance of developing and implementing effective change management plans to insure successful intervention implementation and institutionalization.

**EME 6428 Evaluating HPT Interventions**

College of Ed and Prof Studies, Department of Instructional Design and Tech

3 sh (may not be repeated for credit)

Students will examine the theory and practice of evaluation models and processes as they relate to the formative, summative and confirmative evaluation of instructional and non-instructional HPT interventions. Students will develop the knowledge, skills and abilities necessary to plan and conduct comprehensive evaluations based on best practices.

**EME 6429 Human Performance Improvement**

College of Ed and Prof Studies, Department of Instructional Design and Tech

3 sh (may not be repeated for credit)

Provides students with fundamental knowledge and skills related to the performance, gap and cause analysis activities associated with the practice of Human Performance Technology (HPT). Examines the importance of systems thinking in HPT and the theories and theorists of the field.

**EME 6458 Distance Learning Policy and Planning**

College of Ed and Prof Studies, Department of Instructional Design and Tech

3 sh (may not be repeated for credit)

Examines the history of distance learning and the principles, policies and issues related to the design, development, implementation and administration of distance learning courses and programs in various settings. Issues related to technology, teaching, learning, assessment and faculty and student preparation will be considered from both theoretical and practical perspectives.

**EME 6607 Implementation of Instructional Technology Projects**

College of Ed and Prof Studies, Department of Instructional Design and Tech

3 sh (may not be repeated for credit)

Provides students with the knowledge, skills, abilities, and attitudes necessary to provide leadership in the implementation of instructional technology. Students will learn to identify the constraints and risks associated with instructional technology planning and implementation and develop ways to manage these factors. Students will utilize software tools to manage the implementation of an instructional technology project.

**EME 6609 Principles of Instructional Design**

College of Ed and Prof Studies, Department of Instructional Design and Tech

3 sh (may not be repeated for credit)

Learners will apply a systems approach to the instructional design process. Theoretical underpinnings and practical applications for instructional design will ground the course. Students will apply a research-based model and best practices to design a pedagogically sound instructional product.

**EME 6626 Emerging and Innovative Technology Systems**

College of Ed and Prof Studies, Department of Instructional Design and Tech

3 sh (may not be repeated for credit)

New technology and approaches to teaching and learning evolve and revolutionize how professionals approach technology integration. Explore how innovation and new technologies can be used in instructional strategies to promote performance and learning.

**EME 6678 Theoretical Foundations of Instructional Design**

College of Ed and Prof Studies, Department of Instructional Design and Tech

3 sh (may not be repeated for credit)

Students will examine the key components of the instructional system and the theoretical perspectives that inform the practice of instructional design. The role of communication theories, learning theories, and instructional theories, and the overarching concept of alignment in instructional design will be explored.

**EME 6905 Directed Study**

College of Ed and Prof Studies, Department of Instructional Design and Tech

1-12 sh (may be repeated indefinitely for credit)
EME 6946 Instructional Design and Technology Capstone
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may be repeated for up to 6 sh of credit)
Students critique the academic program, identifying their key learning outcomes, and the courses and specific instructional strategies that led to those outcomes. Students identify, propose, and complete a complex project, integrating knowledge, skills, and abilities developed in multiple classes to solve an instructional or performance related problem in a real organization. Permission is required.

EME 7015 Analysis in Human Performance Technology
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Students investigate the role of analysis in Human Performance Technology and examine theories, models, and philosophical perspectives related to the performance, gap, and cause analysis processes that guide the practice of HPT. Students will integrate theory and practice to design theoretically sound analysis plans to identify root causes of organizational performance issues in various settings.

EME 7063 Research on Emerging and Innovative Technology Systems
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Education specialist students conclude their program with this capstone course in which they apply knowledge and skills gained throughout the program to a scholarly activity in an educational environment. Students integrate a synthesis of theories, concepts, and themes learned in previous coursework. Capstone activities may include a research study, field experience, or special project.

EME 7067 Emerging Technologies-Analysis and Implementation
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Students will investigate various emerging technologies and explore how those technologies can be integrated into instructional settings. Explorations will include the technologies available, which technology is most appropriate for given instructional situations, how to effectively use the technology to support instruction, and the impact of the technology on instruction.

EME 7068 Technology-Based Learning Theory and Research
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Students develop a comprehensive picture of the research and theory related to the field of technology-based learning. Theoretical, historical, empirical, and philosophical perspectives are investigated as students delve into the various aspects of technology-based learning and related research. Students learn to critically analyze how theory and research influence practice.

EME 7075 Distance Learning Design and Development Leadership
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Students will develop a systems perspective of the design and development of distance learning, exploring the associated risks and constraints and ways to mitigate these risks and constraints, particularly with regard to planning for distance learning. Students will investigate the processes and best practices associated with designing and developing distance learning and will develop skills and knowledge to provide leadership in distance learning.

EME 7079 Distance Learning Implementation and Evaluation
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Students will develop the knowledge and skills to be leaders in the implementation of distance learning into educational and training environments. As part of this process, students will develop a plan for implementing and evaluating distance learning and will consider all needed aspects of this kind of plan, including human and financial resources. Students will take a systems approach to implementing and evaluating distance learning, considering the impact of the implementation on the system.

EME 7353 Leading Intervention Implementation and Evaluation
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Students examine strategies for leading the implementation and evaluation of Human Performance Technology interventions. Students will analyze change management and evaluation models and develop the skills necessary to select and implement appropriate approaches to facilitate intervention implementation and evaluation efforts aligned with the planned change, the available resources, and the constraints of the organization.

EME 7357 Intervention Selection, Design and Development Leadership
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Students will critically examine a wide range of potential performance improvement interventions to determine which solutions are best suited for various situations. Students will focus on aligning solutions with identified problems and organizational constraints and effectively communicating recommendations to stakeholders. Students will apply research, theory, and best practices to lead intervention design and development projects.
EME 7365  Human Performance Technology Theory and Research
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Students examine the theoretical and conceptual foundations of the field of Human Performance Technology through a comprehensive review and critical examination of the literature of the field. Students will develop knowledge, skills, and abilities necessary to apply research and theory to practice to improve organizational performance.

EME 7600  Instructional Design and Technology Research
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
This course provides an introduction to the design of research studies in the field of instructional design and technology. Aspects of research design and associated methodologies will be explored. Critical analysis of the research literature will highlight trends for problems and issues warranting further investigation. The quality and rigor of research will be emphasized, including research validity, methods of data collection and analysis, conclusions drawn from evidence, and ethical standards.

EME 7602  Action Research in IDT
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
This course will prepare students to conduct IDT related action research in their individual organizational settings. Students will examine the concepts, processes, and components of action research studies, including problem identification, study design, data source identification, data analysis, and results reporting. Action research is presented as a disciplined process of inquiry for the dissertation in practice.

EME 7609  Principles of Instructional Systems Design
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Students will examine the use of instructional systems design models to create instruction that is appropriate from a pedagogical and practical viewpoint. Theories and models to support the design of instruction for use in a variety of instructional formats will be emphasized. Focus areas will include analysis, instructional goals and objectives, assessment, instructional strategies and the role of formative evaluation in instructional design. Students will apply theories and best practices to design a pedagogically sound instructional product.

EME 7676  Theoretical Foundations of ID, IT, and PT
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Examination of the theoretical foundations of the fields of instructional design, instructional technology, and performance technology. Students will research, discuss, and critique systems, communication, and learning theories and their relationships to instructional and performance technology research and practice. Students will develop the knowledge, skills, and abilities necessary to select and apply appropriate theories to solve instructional and performance technology related problems.

EME 7683  Research-based Models of ID, IT, and PT
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Examination of the research-based models that guide practice in the fields of instructional design, instructional technology, and performance technology. Students will research, discuss, and critique instructional design models, technology integration models, and performance technology models and their applications. Students will develop the knowledge, skills, and abilities necessary to select and apply appropriate models to solve instructional and performance technology related problems.

EME 7692  Doctoral Seminar-Scholarly Writing in IDT
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Focuses on the development of individual scholarly writing skills using structured feedback in a peer review process. Students will work individually to build writing competency by creating a literature review. Students will then review and critique individual writings by working in small peer groups, facilitated by faculty scholars and academic writing coaches.

EME 7905  Directed Study
College of Ed and Prof Studies, Department of Instructional Design and Tech
1-12 sh (may be repeated indefinitely for credit)

EME 7938  IT Research Design Seminar
College of Ed and Prof Studies, Department of Instructional Design and Tech
3 sh (may not be repeated for credit)
Provides Instructional Technology advanced graduate students with the opportunity to conduct an in-depth examination of the processes and procedures in applied IT research, specifically as related to the dissertation process. Students explore how to determine appropriate topics for IT research, format and style for research publications, strategies for conducting literature reviews, hypotheses, a research design, and appropriate statistical application.
EME 8608  IDT Foundations, Issues and Trends  
College of Ed and Prof Studies, Department of Instructional Design and Tech  
3 sh (may not be repeated for credit)  
Examines the history and evolution of the field of instructional design and technology and its relationship to the related fields of educational technology and human performance technology. Examines current issues and trends influencing the field. Focuses heavily on research, critical thinking and communication skills.

EME 8693  Doctoral Seminar-Analysis and Dissemination of IDT Research  
College of Ed and Prof Studies, Department of Instructional Design and Tech  
3 sh (may not be repeated for credit)  
Critical examination of strategies used to structure research studies and disseminate findings in the field of IDT. Students will examine published journal articles, conference proposals, and conference presentations to identify best-practices related to the dissemination of research in IDT. This course will include a residency requirement, to be held in conjunction with a professional conference/ convention, allowing students to observe multiple research presentations and interact with scholars in their field. Following the residency students will develop a proposal to be submitted for presentation at a future conference.

EME 8695  Doctoral Seminar-Coursework Capstone Experience  
College of Ed and Prof Studies, Department of Instructional Design and Tech  
3 sh (may not be repeated for credit)  
This seminar will take place upon completion of all required coursework. Students will demonstrate attainment of program level learning outcomes and readiness to advance to the dissertation phase of the doctoral program. The course will be presented primarily online; however, it will also include a short residency to be completed on campus.

EME 8697  IDT Research Design  
College of Ed and Prof Studies, Department of Instructional Design and Tech  
3 sh (may not be repeated for credit)  
Prerequisite: EME 8695  
Students should enroll in this course after successfully completing the Coursework Capstone Experience. This course guides students through the development of the dissertation-in-practice proposal. Students will work with the instructor and peers to identify an appropriate research opportunity and design the key components of the study, preparing them to work with their individual committees throughout the remainder of the program to develop and defend a proposal, conduct a study, and finalize and defend the dissertation.

EME 8905  Directed Study  
College of Ed and Prof Studies, Department of Instructional Design and Tech  
1-12 sh (may be repeated indefinitely for credit)  

EME 8980  Dissertation  
College of Ed and Prof Studies, Department of Instructional Design and Tech  
1-6 sh (may be repeated for up to 18 sh of credit)  
Major individual research in an area of significant educational interest; designed specifically for candidates in the Ed.D. Curriculum and Instruction, Instructional Technology program. The dissertation reflects intensive educational research produced by the student and collaboratively developed with the student's graduate committee. Graded on a satisfactory / unsatisfactory basis only. Admission to candidacy, completion of all other doctoral program requirements and permission is required.

EME 8981  Dissertation in Practice-Phase 1  
College of Ed and Prof Studies, Department of Instructional Design and Tech  
3 sh (may not be repeated for credit)  
Prerequisite: EME 8609  
The first in a series of four courses structured to support students as they progress through the dissertation phase of the doctoral program. Students must complete all required coursework, the Coursework Capstone Experience, and IDT Research Design prior to enrolling. This course focuses on the development and defense of the dissertation proposal. Students will work under the guidance of a dissertation committee to craft the dissertation in practice proposal and then successfully defend this proposal in an oral defense.

EME 8982  Dissertation in Practice-Phase 2  
College of Ed and Prof Studies, Department of Instructional Design and Tech  
3 sh (may not be repeated for credit)  
Prerequisite: EME 8981  
The second in a series of four courses structured to support students as they progress through the dissertation phase of the doctoral program. Students must successfully complete Phase 1 prior to enrolling in Phase 2. Under the direction of the dissertation committee, students will implement their approved research proposals, collecting and analyzing data. Students will apply for and receive IRB approval prior to collecting data. Upon approval they will collect data, analyze data, and identify appropriate strategies for presenting findings in the dissertation document.

EME 8983  Dissertation in Practice-Phase 3  
College of Ed and Prof Studies, Department of Instructional Design and Tech  
3 sh (may not be repeated for credit)  
Prerequisite: EME 8982  
The third in a series of four courses structured to support students as they progress through the dissertation phase of the doctoral program. Students must successfully complete Phase 2 prior to enrolling in Phase 3. Under the direction of the doctoral committee the student will assemble the final dissertation document using the provided tools to ensure that the document aligns with established requirements. The document will demonstrate exceptional research, critical thinking, and writing skills per established program guidelines.
