

IDS: Interdisciplinary Studies Courses

Courses

IDS 4764 AI Applied

Col of Arts, Soc Sci and Human, Department of English

3 sh (may not be repeated for credit)

This course provides students the opportunity to develop a professional portfolio of AI-supported work that demonstrates mastery of appropriate AI platforms and their applications to the student's chosen professional field. Students will develop their own large project or series of linked projects integrating AI technology as one of the tools. Offered concurrently with IDS 5765. Graduate students will be assigned additional work.

IDS 4890 Senior Capstone

Col of Arts, Soc Sci and Human, Department of Arts, SS, and Hum, Dean

3 sh (may not be repeated for credit)

The Senior Capstone for the Bachelor of General Studies is designed to encourage self-analysis of career and intellectual interests in the student's chosen career or academic field based on the four cognate areas. By way of readings, discussion, analytical exercises, writing assignments, group exercises, and class presentations, students will demonstrate and practice the skills they have acquired throughout their academic careers. Students will develop a detailed project proposal and complete a final research project linking the four areas of study of the student's personalized BGS degree plan with career and intellectual interests. The final written project will consist of research, reviews, and analysis targeted toward a specified audience. A presentation of the project is required.

IDS 4895 Senior Capstone: Culture, Health and Society

Col of Arts, Soc Sci and Human, Department of Arts, SS, and Hum, Dean

3 sh (may not be repeated for credit)

The Senior Capstone for the Bachelor of General Studies: Culture, Health and Society is designed to encourage self-analysis of career and intellectual interests in the student's chosen career or academic field based on the five cognate areas. By way of readings, discussion, analytical exercises, writing assignments, and class presentations, students will demonstrate and practice the skills they have acquired throughout their academic careers. Students will develop a detailed project proposal and complete a final research project linking the five areas of study of the student's personalized BGS: Culture, Health and Society degree plan with career and intellectual interests. The final written project will consist of research, reviews, and analysis targeted toward a specified audience. A presentation of the project is required.
