

Anthropology

The B.A. in Anthropology provides a broad base of information about human culture and what makes humans unique. Culture is the totality of what humans learn and the basis for how humans define the world. Anthropologists study all kinds of individual cultures, both living and dead and simple and complex, in order to gain an understanding of culture as a human phenomenon. The very nature of anthropology is multicultural and historical. This program is hands-on, and students regularly participate in faculty-directed research projects in the Pensacola area. Senior internships and cooperative programs with private firms and government agencies also provide on-the-job training and can lead to employment. The B.A. in Anthropology is a springboard to a wide range of jobs in the private or government sectors, as well as continuing one's academic career after graduation.

Program Requirements

In addition to the university's general requirements and General Education requirements, students seeking the B.A. in Anthropology must meet the requirements listed below.

A grade of "C" or better is required in all major-related courses.

General Education

In addition to the General Education requirements listed on this page, students must satisfy all additional University requirements, including the Gordon Rule, multicultural, and foreign language requirements. With appropriate planning and coordination with an academic advisor, students may satisfy some of the general University requirements through the General Education curriculum. For a complete listing of general degree requirements, refer to the "Graduation and General Degree Requirements (<http://catalog.uwf.edu/undergraduate/universityrequirements>)" section of this catalog.

Archaeology Specialization

The Archaeology Specialization prepares students for graduate study in anthropology-archaeology and employment in cultural resource management in both the private sector and government agencies. The program includes both terrestrial and shipwreck archaeology. There are several archaeologists in the department and at the Archaeology Institute who teach and do research with students. There are almost continuously active faculty-directed archaeology research projects and contracts in which students get hands-on experience in the Pensacola area and surrounding regions. Senior internships with regional and national employers and research institutes provide valuable and practical on-the-job training.

Biological Anthropology Specialization

The Biological Anthropology Specialization prepares students for graduate study in Biological and/or Forensic Anthropology and employment in law enforcement and cultural resource management in both the private sector and government agencies. The program offers students the opportunity to gain hands-on experience analyzing human skeletal remains from both archaeological and forensic contexts through faculty-directed research projects and consultations with Escambia County Medical Examiner's Office and Florida Department of Law Enforcement. Senior internships with regional and national employers and research institutes provide valuable and practical on-the-job training.
